The United Nations Partnership for Action on Green Economy (PAGE) has become a prominent initiative involving five UN agencies, eight funding members, and 22 countries working together to transform economies into key drivers of sustainability and social justice.

It provides tools and services to support nations and regions in promoting economic, financial, and development policies and practices that foster growth, generate income and employment, reduce poverty and inequality, and strengthen the ecological foundations of their economies.

To address the triple planetary crisis, which demands a fundamental shift in economic planning and policies, PAGE continues to guide this reconfiguration toward sustainability and circularity by providing support for creating enabling conditions, reforms, incentives, and sustainable business models. Additionally, it catalyzes investment in green technologies and natural, human and social capital to forge a path toward the future we aspire to.

The PAGE alliance in Argentina thanks its donors and financial partners for their support

PAGE in Argentina

In recent years (2019–2024), the Partnership for Action on Green Economy (PAGE) Program in Argentina has brought together the efforts of five United Nations agencies (ILO, UNDP, UNEP, UNIDO, and UNITAR) to inspire and drive pathways toward a Green Economy in the country. It has developed industrial, labor, financial, and communication policy instruments that have successfully positioned these topics on the national and federal agenda.

Lead Agency: ILO

Counterparts: Government, Employers, and Workers

Focus: Just Transition, Green Jobs, Sustainable Industry, and Green Finance

Duration: From 2018 to 2024

Investment in Argentina:

\$2.17 million
